DETAILED ACTION
EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Logan Brown on June 5, 2008.

The application has been amended as follows:

Claim 3 has been amended to following:

An attachment with a clip, --wherein at least two synthetic resin sheet materials are laminated on a rear side of a front sheet material consisting of synthetic resin, peripheral edges are sealed except for an opening part to form storage parts-- "which attachment includes at least two storage parts each formed by a synthetic resin sheet material and each having peripheral edges sealed except for an opening part", one of the storage parts storing an object used according to a purpose, "the other"--another-- storage part including at least the clip by inserting and attaching a clipping one end portion of the clip, which portion is formed by bending a wire material to form a generally U shape and bending upper ends of the generally U shape inward or outward to be parallel to an inside or outside of the generally U shape, into the other storage part, a clipping other end portion of the clip serving as a locking part locked at an attachment target, the attachment target held between the locking part and the storage part side.

Claim 4 has been amended to the following:

An attachment with a clip, --wherein at least two synthetic resin sheet materials are laminated on a rear side of a front sheet material consisting of synthetic resin, peripheral edges are sealed except for an opening part to form storage parts-- "which attachment includes at least two storage parts each formed by a synthetic resin sheet material and each having peripheral edges sealed except for an opening part", a ventilation part formed in one of the storage parts and the one storage part storing a material that contains an emanative component, "the other"--another-- storage part including at least the clip by inserting and attaching a clipping one end portion of the clip, which portion is formed by bending a wire material to form a generally U shape and bending upper ends of the generally U shape inward or outward to be parallel to an inside or outside of the generally U shape, into the other storage part, a clipping other end portion of the clip serving as a locking part locked at an attachment target, the attachment target held between the locking part and the storage part side.

Claim 7 has been amended to the following:

The attachment with the clip according to claim 3, wherein the rear storage part out of the two storage parts is constituted to form clip insert storage parts "is constituted to form clip insert storage parts" on both sides, respectively, or constituted to be formed as the clip insert storage parts located on both side.

Claims 3-8 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 3-6, there are many similarities between applicant's invention and the invention of Higgins (US patent no. 2,567,602). However, Higgins fails to disclose at least two synthetic resin sheet materials are laminated on a rear side of a front sheet material consisting of synthetic resin; peripheral edges are sealed except for an opening part to form storage parts. None of the other prior art in the record whether taken alone or in combination can solve this dissimilarity.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
